

Fall 2025 Canadian Roadshow

Looking to save big on sludge disposal?

FRC Systems is coming to Ontario and Quebec with a fully equipped **sludge dewatering** pilot skid ready for you to test out. We have a limited offer for six chosen facilities to host our plug-and-play **Multi-Disc Screw Press** for one week—giving you the chance to see how much hauling costs you can save by dewatering your sludge.

Why do a pilot test?

- **Identify real-world cost savings**
- **Zero capital** commitment
- **Easily integrated** with your process
- On-site, **real-time performance insight**
- On-site FRC engineers to **optimize the process**

Why FRC's Multi-Disc Screw Press?

- **Complete solution** with ongoing support
- **2x–4x lower hauling costs** with drier sludge
- **Ultra-low water use**, under 5 gal/hr per screw—100x less than a belt press
- **Consumes up to 20x less energy** than a similarly sized centrifuge
- **Low noise, low odor, low maintenance**
- **Sustainable with stable performance**

Only 6 spots available.
Reserve yours now!
